Facciamo questo lavoro da una vita e ancora oggi il nostro cuore si riempie di entusiasmo e meraviglia di fronte a un prodotto ben fatto.

Forse è proprio questa l'essenza del nostro modo di intendere il design: un'attitudine e un istinto naturale che ci spingono a coltivare le idee per vederle sbocciare e godere della loro realizzazione. Ogni volta che designer, architetti e clienti scelgono un arredamento Midj, per noi è la conferma che stiamo facendo bene quello che più amiamo fare: progettare. È questa la spinta che ci porta a migliorarci sempre. La nostra mente non si ferma mai, è in continuo movimento alla ricerca di un design autentico, capace di trasformare il quotidiano in un'esperienza sempre più piacevole e funzionale.

*Paolo Vernier
Fondatore e Designer*

Design is a wonderful life
We have been doing this job for a lifetime and still today our hearts are filled with enthusiasm and marvel at a well-made product.

Perhaps, this is precisely the essence of our way of understanding design: an attitude and a natural instinct that drive us to cultivate ideas in order to see them blossom and to enjoy their realization. Each time designers, architects, and clients choose Midj's products, for us it is proof that we are doing right what we love most: designing. This is the motivation which leads us to always improve. Our mind never stops, it is constantly moving in search of an authentic design, capable of transforming everyday life into an increasingly pleasant and functional experience.

*Paolo Vernier
Fondatore e Designer*

**Design is
a wonderful
life**

La capacità di risolvere ostacoli tecnici con soluzioni innovative e raffinate.

L'applicazione efficace della digitalizzazione nella gestione di una sofisticata produzione industriale. Questa è l'intelligenza dei nostri nuovi artigiani, che impiegando la tecnologia si dedicano ad ogni prodotto con cura maniacale, come se fosse un pezzo unico. Ogni creazione nasce dalla fusione di tecniche tradizionali e innovazione moderna, dando vita a prodotti che incarnano l'essenza dell'artigianato italiano.

Intelligenza artigianale

Artisanal intelligence

The ability to overcome technical challenges with innovative and refined solutions.

The effective application of digitalization in managing a sophisticated industrial production. This is the intelligence of our new artisans, who, by leveraging technology, dedicate themselves to each product with obsessive care, as if it were a unique piece. Every creation is born from the fusion of traditional techniques and modern innovation, giving life to products that embody the essence of Italian craftsmanship.

Al fianco di designer internazionali

Amiamo il confronto
con designer e
progettisti da ogni
parte del mondo,

perché lo scambio di idee e intuizioni accende in noi quell'emozione che solo la nascita di un nuovo progetto porta con sé. Tutti diversi per storie, competenze ed esperienze ma accomunati da passione e talento. Siamo una grande famiglia italiana dove ognuno è fondamentale per contribuire al risultato. Quando si accende la scintilla e l'idea comincia a prendere forma, c'è qualcosa di elettrizzante nel lavorare insieme per trovare la soluzione giusta, quella capace di portare bellezza e funzionalità, negli spazi del vivere contemporaneo.

At international designers' side

*We love to collaborate
with designers and
architects from
all over the world,*

because the exchange of ideas and insights ignites in us that emotion that only the birth of a new project brings with it. All different in stories, skills and experiences, but united by passion and talent. We are a large Italian family where everyone is essential to contribute to the result. When the spark is lit and the idea begins to take shape, there is something electrifying in working together in order to find the right solution, the one capable of bringing beauty and functionality to the spaces of contemporary living.

ER BECOMING ENTREPRENEURS W

together with your course load. It will also include being rejected several times, pitching your idea, changes in production, exhaustion and disappointments, but it's all part of the learning process and who knows... you might just succeed and make it big.

6) AN AWESOME EXPERIENCE

Having your own business while still attending university will look good on your resume. The lessons you'll learn can help you in the future should you

wish to pursue entrepreneurship, collaborate with like-minded souls on a project or apply for a job in a good company.

7) FINANCIAL FREEDOM

A successful business can allow you to get started paying your college loan earlier. It can also offer you extra cash to invest for your future. Having your own money to manage can help you learn more about personal financial management. Whether you succeeded

or failed with your venture, it will be a valuable experience. The value of money is a good foundation for your future check.

8) YOU CAN AFFORD TO BE "SELFISH"

No, we do not mean the selfish way, While you are young, you don't have much money, you have the freedom to spend as much time as you want
